DETAILED ACTION

Claim Objections

1. Claim 14 is objected to because of the following informalities:

As claim 14, line 4, "a microcellular" must be changed to -- said microcellular -- or -- the microcellular --.

As claim 14, line 6, "a code" must be changed to -- said code -- or -- the code --.

As claim 14, line 21, "said signal" should be changed to -- said CDMA signal --.

As claim 14, line 22, "communicakicate" must be changed to -- communicate --.

As claim 14, line 22, "facce" must be changed to -- face --.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As claim 1, line 13, the recitation "said CDMA signal" is vague and indefinite because it does not referred to any previous elements.

As claim 9, the recitation "said step of measuring" is vague and indefinite because it's unclear what it's referred to one of the steps of measuring of the claim 9 or claim 1.

Art Unit: 2665

As claim 14, lines 14-15, lines 17-18, "said at least one remote microcell" is vague and indefinite because it does not refer to any previous elements.

As claim 14, lines 20 and 24, "said calculations" is vague and indefinite because it's unclear if it is refer to the calculating means or not or based on the calculated value. Please clarify, so the meter and boundary of the claim can be determined.

As claims 15-22, these claims are vague and indefinite because the apparatus claims can not depend on the method claim. Please clarify, so the meter and boundary of the claims can be determined. The examiner assumes that these claims are depended on claim 14.

There is insufficient antecedent basis for this limitation in the claims.

Double Patenting

4. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

5. Claims 1-13 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-13 of prior U.S. Patent No. 6366571. This is a double patenting rejection.

Regarding claims 1-13, the claims of patent 6366571 are identical to the claims of the present application.

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or

Art Unit: 2665

improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 14-22 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-13 of U.S. Patent No. 6366571. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims 1-13 of the patent are encompassed the limitation of the claims 14-22 excepting for measuring a loss in the fiber option connections. However, the method and system for determining a loss of the fiber connections is well known and expected in the art at the time of invention was made. Therefore, it would have been obvious to one of ordinary skill in the art at the time invention was made to apply a device for determining a loss in fiber connections.
